COCOP

Full Title: Coordinating Optimisation of Complex Industrial Processes

Aim:

The vision of COCOP is that complex process-industry plants are optimally run by operators with the guidance of a coordinating, real-time optimisation system.

Concept: The project's objective is to enable plant-wide monitoring and control by using the model-based, predictive, coordinating optimisation concept in integration with plant's automation systems.

Start date: 1 October, 2016

End date: 31 March, 2020
