IMPRESS

Full Title: Integration of efficient downstream ProcessEs for Sugars and Sugar alcohols

Aim:

IMPRESS will demonstrate and validate a new hybrid biorefinery process for the first time. The aim is to find ways to produce sustainable chemicals and materials.

Concept: IMPRESS integrates disruptive upstream and downstream technologies developed by the project partners. IMPRESS concept uses 2nd generation lignocellulosic biomass and turns process streams into value added products and green chemicals to replace existing fossil-based products.
