

SPIRE-02-2014

MOBILE FLIP

Full Title: Mobile and Flexible Industrial Processing of Biomass

Aim:

MOBILE FLIP aims at developing and demonstrating mobile processes for the treatment of underexploited agro- and forest based biomass resources into products and intermediates. The processes will be evaluated in terms of raw material flexibility, as the biomass resources are typically scattered and seasonal.

Concept: Process concepts have been designed around the key technologies pelletizing, torrefaction, slow pyrolysis, hydrothermal pretreatment and carbonisation.

Start date: 01/01/2015

End date: 31/12/2018
