

NEWSLETTER NR. 4 - AUGUST 2017

EDITORIAL

In its unrelenting effort to support process industries in their transition towards a circular economy, the EPOS project continues to reaffirm and support its positive position on the benefits and reality of industrial symbiosis. While the preliminary studies confirmed the existence and potential of industrial symbiosis in European industrial clusters, the EPOS project is now able to demonstrate specific examples of real-world cases. These results were achieved by the cooperation of the companies involved. Please enjoy our latest news and results!

The EPOS project team.

NEWS

EPOS Interactions

EPOS young graduates need your help!

One of the goals of the EPOS project is to analyse key drivers and pitfalls of industrial symbiosis currently happening or planned on manufacturing sites in Europe. A short survey was created for this purpose.

You can fill out the survey [here](#).

Technology Watch

Stay informed with what is of interest to the EPOS project. Here you will be able to find weekly updates on four topics: Technologies & Innovation, Conferences and industrial fairs, Policies and regulations, and Scientific publications.

Industrial Innovation Information Days 2017

3-4 October 2017, Brussels, Belgium

The aim of the event is: build the basis for the future of Industrial Research in Europe, inform relevant Industrial Technologies providers and users about EU activities in the field, and enhance cooperation among Industrial stakeholders.

More information can be found [here](#).

6th European Conference on Corporate R&D and Innovation

27-29 September 2017, Seville, Spain

Key objectives of this Conference are to identify the research, business and policy challenges in this area for the decade to come, and to provide guidance to the EU industrial research and innovation policy agenda.

More information can be found [here](#).

EPOS Associations

Have a look at the latest publication from SPIRE. "*Public Private Partnerships (PPPs) are extremely important and beneficial instruments acting as key-providers of innovative solutions that ensure competitiveness and sustainability for European industries and offer solutions to the EU's Societal Challenges.*"
