

EPOS WP 1 – Scope and (de)limitations

Lead: INEOS Technologies France SAS (INEOS)

Long-list of metrics and system settings for IS (III)

D1.6

École Polytechnique Fédérale de Lausanne (EPFL)

September, 2019

Summary

This deliverable, D1.6, is completed within the framework of the first work package of the EPOS project, set out to provide the current state of industry and to obtain an industrial baseline. It provides an update for the long-list of metrics and system settings. This update provides the final selected list of KPIs for use in the EPOS toolbox and a description of the implementation of non-technological KPIs, following a simplified LESTS approach.
