

EPOS WP 3 – EPOS tool development

Lead: EPFL

Non-technical IS methodology and EPOS footprinter (II)

D3.8

Ghent University (UGent)

September, 2018

Summary

Deliverable 3.8 is an update on the proposal for the non-technical IS guidelines that were presented in D3.2. D3.2 was compiled to provide guidelines for the implementation of industrial symbiosis from a non-technical perspective, thus setting the boundaries for sustainable cross-sectorial exchanges and interactions. Answering to the subtask 3.3.1, under task 3.3 – Non-technical cross-check and EPOS footprinter, D3.8 provides the progress made to incorporate the non-technical aspects of LESTS (D1.1) into the EPOS toolbox.
