

## EPOS WP 4 – Tool validation and assessment

**Lead: ArcelorMittal Maizieres Research SA**

Review generic IS assessment matrix

D4.3

ArcelorMittal Maizieres Research SA (AMMR)

September, 2019

## Summary

The objective of this deliverable is to consolidate the review of the assessment matrix, described in deliverable D4.2, reinforced with insights from industry and from the work in WP5, making use of the LESTS scores.

The goal of the generic IS assessment matrix is to make an evaluation for industrial symbiosis from a non-technical point of view covering the full life of a project. An improved version of the LESTS score contextualised for each the life's project stage was developed as the assessment matrix.

A step by step user guide to use the matrix is provided in order to ensure the quality of the output of the assessment. The guide is based on the feedback from the different users of the LESTS score and the assessment matrix.
