Policy recommendations to support industrial symbiosis activities in
Europe

D6.4

STRANE INNOVATION (Strane)

September, 2019

Summary

Industrial symbiosis can help reach positive social and environmental impacts and support the economic development of territories locally. The EPOS project showed many promising results, which enables waste to be seen as a resource. This document lists the policy recommendations based on EPOS findings.

Recommendations are structured by subject for a better readability:

- Waste classification and licensing
- Waste heat recovery
- Standardisation
- Funding schemes
- Exchange of data
- IS facilitation
