

EPOS WP 7 - Dissemination

Lead: CimArk

Course & manual for Osmose and EPOS tools (II)

D7.3

École Polytechnique Fédérale de Lausanne (EPFL)

March, 2018

Summary

This deliverable (D7.3) confirms the creation of the EPOS toolbox manual within the EPOS project, through the EPOS User Club (D7.6) which is the hub of information for using the EPOS toolbox. This report does not present the whole manual, as the intention is to constantly add and adapt it as the toolbox moves through its development phases. Thus, this deliverable verifies the creation of the manual within the User Club and the preliminary manual for using the current version of the toolbox.
