Activity	Preparation of a leaflet in Portuguese with the presentation of the project PORTABLECRAC. This leaflet is used as source of information during the prospective analysis of end-users in Portugal.
Short description	The leaflet describes the aims of the PORTABLECRAC project and highlights the environmental and economic advantages of the electrochemical regeneration of saturated activated carbon compared to the actual thermal regeneration. It is also identified the partners, the project duration and that project has received funding from the European Union's Horizon 2020 research and innovation programme.
Attachments (photos, presentations, flyer, etc)	<i>Attached it is presented the leaflet prepared in Portuguese.</i>
